Description of Request:When making your request, please be as specific as possible and include information such as make, model, manufacturer, color, quantity, etc.

The athletic equipment room currently is also where team uniforms and training room laundry is done. However, there is poor ventilation for the two machines that currently work and or connected. I request that the current location be renovated for industrial washer/driers and proper ventilation be created to prevent the room from being unsafe for working in during the laundry process.

Currently on hot days, the room's temperature is dangerously high. There is not forced air in the room and even on cooler days, the temperature climbs to an uncomfortable level.
